Caneta Research Inc.
Senior Research Engineer

Located in Mississauga, Caneta is a leader in the field of building energy efficiency. A major component of the company's projects includes support for governments and utilities regulating HVAC equipment efficiency, developing codes or standards, investigating new technologies and developing incentive programs.

Caneta is currently seeking a Senior Research Engineer to join our group of experienced building energy modellers. Reporting to the senior management, this person will be responsible for managing and performing Caneta's research studies for government and utility clients in addition to proposal development for research studies. Additional responsibilities may be possible depending on the applicant's experience.

Responsibilities and Duties

- Undertake technology investigations and engineering studies of advanced HVAC systems.
- Prepare research study proposals and deliver presentations to clients.
- Interact with clients.
- Supervise junior staff on research projects.
- The successful applicant may also prepare building energy simulation files and undertake energy analysis for architectural and engineering clients using software such as eQuest.

Qualifications

- Experience conducting research in the area of building energy efficiency.
- Strong written communication skills, experience writing engineering reports and giving presentations.
- Experience with Excel, Word and PowerPoint.
- Understanding of HVAC systems.
- Experience with energy modelling software such as eQuest and EnergyPlus will be considered an asset.

This position involves remote working – Applications across Canada will be considered

Compensation will be commensurate with applicant's experience
